

Now it is easier to use distributed computing resources

GISELA Science Gateway:
Grid in one click

Grid Initiatives for eScience virtual communities in Europe and Latin America
<http://www.gisela-grid.eu/>

<http://www.redclara.net/>

- ✓ Easy to use
- ✓ Simpler
- ✓ Immediate authentication
- ✓ Tailored to your community

The Science Gateway (SG) is a graphical interface that, even though is a set of complex tools, data and applications, is presented to research communities in a direct and attractive way to use computing resources with a single click.

We are building our Regional Science Gateway.
Help us to continue, tailored to Latin America's needs.

Steps:

1 Know the site:

<https://gisela-gw.ct.infn.it/science-gateways> 

2 Register

If your country is not in the list of Identity Federations, we provide you a temporary identity.

3 Start using the SG with any of these options:

- a- Testing the first applications available.
- b- Requesting to integrate your own applications. Fill the survey:
<http://applications.epikh.eu/survey4sciencegateways>
- c- Applying for a SG configuration for your community.

We offer training
